

ESLAM ABDELBASSET

SENIOR BACKEND DEVELOPER & FULL STACK ENGINEER

Cairo, Egypt • +20 106 083 8210 • eslamabdelbasset1@gmail.com • [linkedin.com/in/eslamabdelbasset](https://www.linkedin.com/in/eslamabdelbasset) • github.com/eslamabdelbasset1 • eslamabdelbasset.vercel.app

PROFESSIONAL SUMMARY

ENTERPRISE & MULTI-TENANT SAAS ARCHITECTURE • 5+ YEARS EXP

Highly accomplished Senior Backend Developer and Full Stack Developer with 5+ years architecting distributed enterprise systems, high-throughput APIs, and multi-tenant SaaS & ERP platforms. Expert in PHP 8+, the Laravel ecosystem, Vue.js, React.js, and cloud infrastructure. Proven track record of scaling database performance by 40%, automating mission-critical business workflows, and deploying high-availability platforms serving thousands of concurrent users. Adept at mentoring engineering teams, applying SOLID, Clean Architecture, and Domain-Driven Design (DDD), and translating complex business requirements into resilient, secure, and production-ready applications.

PROFESSIONAL EXPERIENCE – COMPANIES I'VE ENGINEERED FOR

FULL-CYCLE SYSTEM ENGINEERING

Loc Camp – Senior Backend Developer

Oct 2025 – Present

Platforms Built: Loc Camp Platform, OSP Communities, PES (Education Schools), xLingo (HR CRM SaaS), Transrare, Washi *Al Jizah, Egypt*
Globalize

- Architect and scale high-throughput server-side infrastructure and RESTful APIs using Laravel and PHP 8+, handling concurrent volumes with sub-100ms response latencies across multi-client ecosystem platforms.
- Design and implement multi-tiered caching layers using Redis and Laravel Cache, reducing database query overhead by 50% and accelerating web application response times.
- Engineer real-time event broadcasting and instant notification pipelines using Laravel Echo, Pusher, and WebSockets (ShouldBroadcastNow interfaces) for live reservations and platform updates.
- Standardize Nginx configurations and maintain secure, highly-available Ubuntu production environments on cloud instances via automated SSH protocol.
- Champion clean-code standards, Domain-Driven Design (DDD) principles, and rigid code-review workflows, reducing technical debt by 30%.

Const Tech – Senior Backend Developer & Optimization Consultant

Aug 2025 – Oct 2025

Key Deliverables: High-Traffic Enterprise Platform Scaling & Architecture (const-tech.org)

Riyadh, Saudi Arabia (Remote)

- Contracted as Senior Backend Consultant to spearhead system performance optimization and architectural scaling for enterprise platforms in the Saudi market.
- Diagnosed and resolved critical database bottlenecks by optimizing complex SQL queries, composite indexes, and Eloquent relationships, resulting in a 40% performance boost.
- Developed secure, standardized RESTful API endpoints for external integrations with third-party enterprise business systems.
- Collaborated closely with product stakeholders to deliver resilient, production-ready modules under aggressive release timelines.

Manarat El Asr – Lead SaaS Architect & Backend Consultant

Nov 2024 – May 2025

Key Deliverables: Multi-Tenant SaaS ERP (8 Domains) & Tog.sa ZATCA Phase 2 Sync

Riyadh, Saudi Arabia (Remote)

- Spearheaded system design for a scalable multi-tenant SaaS ERP covering 8+ enterprise business domains with strict tenant data isolation.
- Engineered full integration and automated synchronization with Tog.sa ZATCA Phase 2 e-invoicing, compliant with Saudi tax and billing standards.
- Architected modular RESTful services with Laravel Sanctum and scoped authorization tokens, serving high-concurrency client requests.

Alshamel Holding – Senior Backend Developer

Apr 2024 – Aug 2025

Core Platform: Enterprise ERP (Real Estate, Stocks & Assets, Rent Management, Archiving Vaults, HR, Finance) *Kuwait City, Kuwait (Remote)*

- Led backend architecture for a comprehensive enterprise ERP covering Real Estate portfolios, stock & inventory tracking, rent cycles, and digital document archiving.
- Designed and built scalable RESTful APIs authenticated with Laravel Sanctum/JWT, serving modular reactive Vue.js front-end interfaces.
- Optimized ERP relational database schemas and queries, cutting server load by 40% and boosting transaction consistency.
- Engineered custom business workflows that streamlined administrative operations by 60% across 5+ internal departments.
- Automated deployment of ERP instances on Linux virtual servers using custom CI/CD pipelines, Docker containers, and Nginx.

Ibtikarat – Mid-Level Backend Developer

Dec 2023 – Apr 2024

Key Deliverables: FinTech Gateway Routing, Secure Payment Microservices

Cairo, Egypt

- Developed high-performance web applications and integrated secure payment gateways (Stripe, local e-wallets) to handle multi-currency transaction routing.
- Engineered low-latency API frameworks with JWT authorization, scoped permissions, and automated transaction verification.
- Crafted complex relational schemas in MySQL, optimizing queries to improve data retrieval speeds by 35%.

Sneakers Dubai – Mid-Level Full Stack Developer & Designer

Key Deliverables: Flagship E-Commerce Store & Visual Brand Architecture

- Spearheaded full-stack engineering, performance customization, and visual branding for the brand's flagship e-commerce platform.
- Developed responsive front-end layouts and customized checkout pipelines, boosting digital sales conversions by 25%.
- Managed theme customization, plugin integrations, and full technical SEO, increasing organic traffic by 40%.

Mar 2021 – Dec 2023

Dubai, UAE (Remote / Freelance)

Impact Studios – Junior Full Stack Developer

Key Deliverables: International Client Platforms & Media Web Apps

- Built responsive web interfaces for international clients; supported CI/CD deployments on Linux/Nginx/Apache environments.
- Delivered cross-browser compatible modules adhering to strict design specifications under agile team sprints.

Mar 2020 – Feb 2021

United Kingdom (Remote)

FEATURED PROJECTS – SCALABLE SYSTEMS IMPACTING REAL BUSINESSES

PRODUCTION IMPLEMENTATIONS

Layout International layoutintl.com Enterprise publishing infrastructure unifying print and digital newsroom workflows. Integrated robust Laravel microservices, Vue.js interfaces, and AI content tools. Laravel, PHP 8+, Vue.js, Microservices, Redis Caching, MySQL	Tog.sa & Tog Stores tog.sa ZATCA Phase 2 compliant e-invoicing SaaS for the Saudi market. Implemented secure billing calculators, dynamic multi-branch inventory, and full ERP synchronization. Laravel, ZATCA e-Invoicing, Multi-Tenant SaaS, PostgreSQL, Redis
Tog Stores URL Shortener s.tog.sa High-performance link analytics & redirection engine featuring real-time click tracking, geolocation analytics, sub-50ms redirects, and dynamically rendered QR codes. PHP 8+, Redis Caching, High-Concurrency Queues, Dynamic QR Engine	EgyptAir Administrative Portal Internal Enterprise Digitized workflows for the Air Hospitality Sector. Reduced processing times for employee evaluations and document lifecycles by 45% for 200+ staff with RBAC matrices. Laravel, RBAC Security Matrices, Document Lifecycle Automation, MySQL
xLingo Multi-Tenant HR & CRM Loc Camp SaaS Multi-tenant workforce and client relationship platform with tenant-isolated database schemas, customizable role hierarchies, and automated salary/attendance logs. Laravel, Multi-Tenant SaaS, Vue.js, Redis, MySQL, Automated Workflows	PES Education & OSP Communities Loc Camp Ecosystem Private Education Schools administration system and localized community engagement portals with real-time push notifications, attendance, and member directories. Laravel, WebSockets, Pusher, Livewire, MySQL, Nginx Cloud Instances
Const Tech Enterprise Platform const-tech.org High-traffic enterprise solution scaled for the Saudi Arabian market with optimized SQL execution plans, composite indexes, and standardized API integrations. Laravel, SQL Query Optimization, Redis, RESTful API Microservices	Hyper EG & IA Pallet Logistics hyper-eg.com Retail e-commerce platform with real-time cart checkout synchronization, local payment gateway routing, and industrial supply chain dimension calculation portals. Laravel, Livewire, Payment Gateways, Vue.js, Logistics Dispatch Engine
Panoorama EG & The Baz Method panooramaeg.com High-end creative portfolio platform with optimized CDN video streaming, and a fitness coaching platform with automated monthly Stripe subscriptions. Interactive Web APIs, Stripe Subscriptions, Video Streaming CDN, Laravel	El Bayan Law Practice System Legal Practice System Comprehensive legal management system featuring court hearing schedules, client document vaults, automated deadline notifications, and granular case billing logs. Laravel, Secure Document Vault, Case Tracking Workflows, MySQL

TECHNICAL SKILLS & ARCHITECTURE TOOLS

STANDARDIZED TOOLCHAINS

Languages & Runtimes	PHP 8+, JavaScript (ES6+), TypeScript, Node.js, Python, C++, SQL, Bash Scripting
Frameworks & Frontend	Laravel, Livewire, Vue.js, React.js, Nuxt.js, Inertia.js, Symfony, Angular, Tailwind CSS, Bootstrap, Sass
Databases & Caching	MySQL, PostgreSQL, Redis, MongoDB, SQLite, Eloquent ORM, Database Indexing, Query Optimization
DevOps & Cloud	Docker, Linux / Ubuntu, Nginx, AWS, Apache, SSH Protocol, CI/CD Pipelines, Git, GitLab CI
Core Specializations	Multi-Tenant SaaS Architecture, System Design, API Security (OAuth2/JWT), Domain-Driven Design (DDD), ZATCA Phase 2 e-Invoicing, WebSockets & Real-Time Broadcasting, Payment Gateways (Stripe, Wallets), Microservices

EDUCATION & DIPLOMA CREDENTIALS

ACADEMIC FOUNDATION

Modern Academy for Computer Science & Technology – Bachelor of Computer Science	2018 – 2022	Cairo, Egypt
Route Academy – Full Stack Development Diploma	2020 – 2021	Giza, Egypt
Modern Academy for Computer Science & Technology – C++ Programming Diploma	2017 – 2018	Cairo, Egypt

LANGUAGES

MULTILINGUAL COMMUNICATION

Arabic: Native • English: Very Good

LATEST WRITING & TECHNICAL PUBLICATIONS

ARCHITECTURE INSIGHTS

Scaling Multi-Tenant SaaS Architecture at Enterprise Level (2024) Database isolation patterns, tenant-scoped caching with Redis, zero-downtime schema migrations. Streamlining Enterprise Deployments with Docker & GitLab CI (2022) Multi-stage container builds, automated security checks, SSH hooks, and zero-downtime rollouts.	Optimizing ERP Systems for High Traffic Environments (2023) Complex query tuning, composite indexing, and asynchronous Redis worker queues. Building Secure and Scalable APIs (2022) OAuth2, scoped tokens, rate limiting, request throttling, and REST API standardization.	Implementing Real-Time Features with Laravel Echo & WebSockets (2023) Bi-directional event broadcasting, private channels, and high-frequency live push updates. Transitioning to Modular Monoliths with Domain-Driven Design (2021) Bounded contexts, domain services, value objects, and decoupled architecture before microservices.
